

08 *beads*

Crystal Beads are very popular and easy to use. They are available in the latest fashion colours, effects and cuts. Used in a variety of applications (beading, sewing, wire work, etc.), they blend perfectly with other crystal elements. They are available as loose elements, or linked as Bead Chains (please see Cupchains & Findings assortment).

Classic Colours: This colour range offers a wide choice of traditional Swarovski crystal colours.
 Exclusive Colours: This colour range is offered exclusively by Swarovski.

Slight changes in shades are unavoidable.

The plating resistance of effects is tested according to Swarovski's plating guidelines (WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS). Customers are advised to carry out their own tests if customers' plating parameters diverge from Swarovski plating guidelines.

* Colours are only available as special productions.

Beads

The photograph shows a single, rough diamond crystal with a complex, faceted structure. Below it are three 2D line drawings of the crystal's faces, each showing a different orientation of the crystal's internal structure. The first drawing on the left shows a face with a central square and four triangles. The middle drawing shows a face with a central square and four triangles, but with a different orientation of the internal structure. The third drawing on the right shows a face with a central square and four triangles, but with a different orientation of the internal structure.
