

SWAROVSKI

## 13 SYNTHETICS *hotfix*

These versatile products open up a multitude of creative design possibilities through their numerous application techniques. They combine elegant SWAROVSKI ELEMENTS with a synthetic carrier material that can be applied using Hotfix technology. They are ideal for the use in the textile, interior and accessories segments.

Crystal Transfabric represents the fusion of two very successful products: Transfers and Crystal Fabric to achieve new levels of elegance and sophistication.

Crystal Rocks a completely new, innovative and stunning design element that showcases large double pointed Chatons.

Crystal Fabric is an innovative product that consists of a carrier material that is completely covered with millions of tiny cut and uncut crystals.

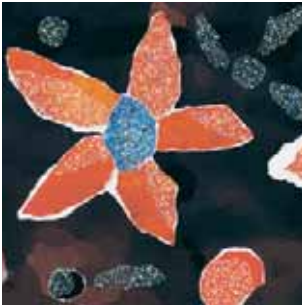

Crystaltex is available with a wide range of XILION Rose colours and a variety of carrier materials to make it the perfect choice for creating a full spectrum of designs.

Small XILION Chatons turn the Crystaltex Chaton Bandings into an exciting and luxurious statement in the fashion world.

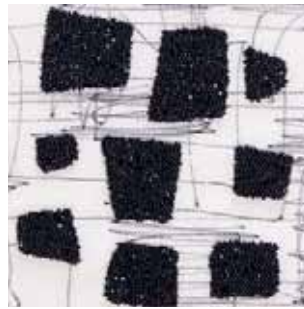

Application Examples

<<<

Depending on the colour and surface of the carrier material it is applied to, Crystal Fabric with transparent film changes its look dramatically. Please find herein some examples.

Black on black combines to create a deep, mysteriously soft gleam dressed up with a very alluring sparkle. For the first time, surfaces are rendered impenetrable by a soft, inky black embellished with shiny crystals.

73 Synthetics Hotfix

A special motif is any individual design created by the customer, which is different from the Crystal Fabric Standard, Trend or Special Collections. This service opens up many customisation possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customisation options for existing motives is available (see "Customisation Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs.

## Customisation Possibilities for Crystal Fabric

&lt;&lt;&lt;

- Max. motif size 680x1800 mm
- Min. motif size of 10x10 mm
- Min. width of holes within motives: 3 mm
- Min. Crystal Fabric surface: 3 mm
- Min. size of the smallest element within a motif: 10x10 mm

## Ordering Process

&lt;&lt;&lt;

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to. You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

## Please Note

&lt;&lt;&lt;

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motives with a minimum gap of 3 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fabric Motives may generally differ from the sketches or prints in relation to the motives' outline, especially with regards to spaces that are smaller than 3 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims shall therefore not be entertained by Swarovski.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer.

Large double-pointed Chatons make Crystal Rocks an eye-catching, luxurious and innovative new design element. The unique and brand new product is offered with a Special Motif Service which enables the design of customised patterns. Crystal Rocks is the perfect solution for the fashion accessories, jewellery and interior segments.

Synthetics Hotfix

A special motif is a design created by the customer, which is different from the Crystal Rocks Standard Collection. This service opens up many customisation possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customisation options for existing motives is available (see "Customisation Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs.

## Customisation Possibilities for Crystal Rocks

&lt;&lt;&lt;

- Min. size: 15x15 mm
- Max. size: 400x330 mm
- Min. Crystal Rocks surface: 9 mm
- Min. width of holes within motives: 10 mm
- Min. size of the smallest element within a motif: 15x15 mm

## Ordering Process

&lt;&lt;&lt;

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

## Please Note

&lt;&lt;&lt;

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motives with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks Motives may generally differ from the sketches or prints in relation to the motives' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims shall therefore not be entertained by Swarovski.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer. Over- or undersupply of +/- 10% is possible and has to be accepted.

## Application Advice & Care Instructions

&lt;&lt;&lt;

### Hotfix Application

Crystal Rocks can be easily applied using a standard heat press. The following parameters should give you an overview about the possibilities of applying Crystal Rocks onto different materials. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original materials.

A special motif is any individual design created by the customer, which is different from the Crystal Transfabric Standard or Trend Collections. This service opens up many customisation possibilities. There is also no need to set a motif by hand. You can rely on Swarovski's longtime experience and design expertise and can order a convenient, ready-to-apply design. A range of customisation options for existing motives is available (see "Customisation Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign or garment. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs.

## Conditions for designing Crystal Transfabric

&lt;&lt;&lt;

- Max. size of the motif is 500x210 mm
- Min. size of the motif is 10x10 mm
- Min. width of holes within motives is 3 mm
- Max. surface of Crystal Transfabric without Flat Backs is 15x15 mm
- Min. distance between the Flat Backs is 1.5x1.5 mm

## Customisation Possibilities

&lt;&lt;&lt;

- Change of elements of an existing motif
- Change of size of an existing motif
- Logos or brand names
- Creation of pieces or rows
- Up to five colours/elements possible per motif

## Ordering Process

&lt;&lt;&lt;

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to (Crystal Transfabric, Transfers, Crystal-it etc.). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

## Please Note

&lt;&lt;&lt;

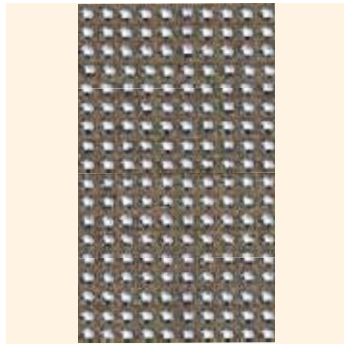

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer.

The MOQ for Standard Motives is 1 packing unit (approx. 5 metres). Samples can be ordered below 1 packing unit. If the Standard Motives are modified (colour changes) please refer to the detailed MOQ information in the table above. This product must be ordered in metres.

Article Explanation

<<<

Crystaltex Motives are now also available as Special Motives (customised laser-cut motives). The extended assortment of colours can be combined with six different base materials and opens up a multitude of options for individual designs. Up to eight different colours can be incorporated in a motif.

## Special Motif Service

&lt;&lt;&lt;

A special motif is any individual design created by the customer, which is different from the Crystaltext Motives Standard or Trend Collections. This service opens up many customisation possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customisation options for existing motives is available (see "Customisation Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs. All Standard Crystaltext Motives are also available as „It-version“ and vice versa.

## Customisation Possibilities

&lt;&lt;&lt;

Min. size: 12x12 mm (4x4 stones)

Max. size: 122x162 mm

Distance between the Flat Backs SS 10 (from stone centre to stone centre):

- Max. 4.8 mm
- Min. 3.4 mm

Distance between the Flat Backs SS 6 (from stone centre to stone centre):

- Max. 3.7 mm
- Min. 2.4 mm

Up to eight colours are possible for Crystaltext Motives using either SS 6 or SS 10 stones (mix of stone sizes is not possible).

## Ordering Process

&lt;&lt;&lt;

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to. You will then receive a quotation including your article number, minimum order quantity (MOQ), price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

## Please Note

&lt;&lt;&lt;

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer.

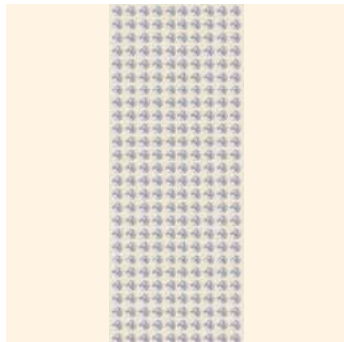

Over- or undersupply of +/- 10% is possible and has to be accepted.

Small XILION Chatons turn this new product into an exciting, luxurious and unique statement in the fashion world. Crystaltext Chaton Bandings offer a wide range of design possibilities for the jewellery, fashion accessories, and interior segments.
