

COLLECTION SUMMARY

CRYSTALLIZED™ *becomes* SWAROVSKI ELEMENTS

SWAROVSKI ELEMENTS – THE PREMIUM BRAND FOR FINE LOOSE CUT CRYSTALS

DEAR BUSINESS PARTNER,

Since 1895, Swarovski has based its reputation on the power of precision-cut crystal, creativity and innovation. To complete the vision of crystal perfection, the founder Daniel Swarovski established a demanding principle that still defines Swarovski today: “constantly improve on what is good.”

True to the founder’s spirit, the company is eager to further develop its brand communication for your benefit. Thus, the name of the crystal components brand will be optimised, granting a stronger emphasis on the Swarovski brand.

From June 2010, CRYSTALLIZED™ – Swarovski Elements becomes SWAROVSKI ELEMENTS.

WHAT YOU GAIN

As our business partner, you profit from the bundled energy of one and thus all the more effective premium brand:

The premium brand in Crystal and Lifestyle: Swarovski

With SWAROVSKI ELEMENTS you benefit from the power of the umbrella brand Swarovski® – a trademark with unmatched international reputation. You profit from the strong global presence generated by all Swarovski initiatives, events, retail activities and concept stores in all important cities. This strong link to the Swarovski brand allows you to reach your customers more frequently and approach countless potential customers who are familiar with the brand through other areas.

STRASS® Swarovski® Crystal under the same strong umbrella

Within the brand optimisation, Swarovski’s components brand for lighting, design and manufacturing – STRASS® Swarovski® Crystal – will be brought under the same single strong umbrella. Just as CRYSTALLIZED™, STRASS® will be merged into SWAROVSKI ELEMENTS from June 2010. The product advantages remain unchanged: absolute purity, maximum-precision cut, individual quality control and unmatched brilliance.

Greater creative potential

The position of SWAROVSKI ELEMENTS as THE premium brand for fine loose cut crystals gives you access to synergies across many different segments, boosting your efficiency through brand communication that spans the entire value chain. You endorse your products with the brand and finest choice of crystal ingredients. As a partner of SWAROVSKI ELEMENTS you have immediate access to a wide range of products. This abundance of colours, effects, cuts, sizes and application types opens the door to new creative possibilities.

WHAT STAYS THE SAME

Under SWAROVSKI ELEMENTS you will enjoy all the benefits that you have come to appreciate through your prior partnership. In addition to the unchanged premium product quality, we maintain our high level of service for:

Optimum communication support

As a business partner of SWAROVSKI ELEMENTS, we will continue to supply you with a comprehensive communication package that is perfectly tailored to your needs and give you access to training.

Well-proven visual identity

The visual identity of SWAROVSKI ELEMENTS follows the well established standards of CRYSTALLIZED™ – *Swarovski Elements* – with regard to the shape of the brand tag, colour coding and typefaces. The appearance of brand and communication support tools remains unchanged. All that will change is the emphasis on the Swarovski brand.

Segment-specific and trend-oriented product innovation

We will continue to regularly introduce trend-oriented product innovations specially tailored to your area of business. To this end, Swarovski's trend experts collaborate closely with internal and external specialists and market researchers. We will naturally also continue to keep you thoroughly informed about upcoming trends.

MUTUAL SUCCESS

As with every important step forward, we can only make a successful transition to SWAROVSKI ELEMENTS as a team. We look forward to taking this step together with you and thank you in advance for your cooperation and trust!

We will gladly provide additional information and answer any questions you may have – just contact your Swarovski representative.

SWAROVSKI ELEMENTS – A PORTRAIT

SWAROVSKI ELEMENTS is the premium brand for fine loose cut crystals in fashion, accessories, jewellery, interior design, and the lighting business. The brand stands out by virtue of its creative and strong emotional appearance – it has long been an elemental part of modern luxury.

SWAROVSKI ELEMENTS is present around the world – through multifaceted communication initiatives, events, PR activities and collaborations. It is used by leading designers and creative people in many different areas.

SWAROVSKI ELEMENTS has been the ingredient of choice by leading designers since 1895.

The «MADE WITH SWAROVSKI ELEMENTS» label serves as a guarantee of quality, authenticity and integrity on design pieces.

More information about the world of SWAROVSKI ELEMENTS is available at WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS.

Basic Information

SWAROVSKI ELEMENTS

<<<

Swarovski is the leader in production of precision-cut crystals that are used in the fashion and jewellery industry as well as in the world of lighting design, architecture and interior. Swarovski crystals have become an indispensable material for the creations of international designers. Swarovski is selling its loose crystal elements to the worlds of fashion and design under the product brand SWAROVSKI ELEMENTS.

Collection – Summary

<<<

This brochure introduces a selection of the vast assortment of SWAROVSKI ELEMENTS to you. Should you wish to explore the exciting possibilities beyond these examples, please access information and place orders from the comprehensive and complete Elements Collection.

In the beginning of this brochure the most important colours and effects of the products that have been included in this special selection are illustrated. A fold out section in the end of the brochure presents an overview of crystal stone sizes.

The brochure shows all crystal elements (jewellery stones, crystals with or without Hotfix glue, beads, pearls, pendants etc.) with details of available sizes under each product picture. In addition, all semi-finished products list relevant details such as C = crystal colours, E = elements, R = number of rows, S = sizes in millimetres, SS = stone sizes etc.

Your nearest Swarovski sales office has comprehensive information on the entire range of SWAROVSKI ELEMENTS. This information is also available on our Business Website WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS. Please also refer to the business website for all contact details of your nearest Swarovski sales office, which will be pleased to assist you with information concerning products, ordering, etc.

Ordering

<<<

To order products, please contact your nearest Swarovski sales office. Registered customers also have the convenient option to order online via the e-commerce service of WWW.B2B.ECOMMERCE.SWAROVSKI.COM. In addition to providing an online ordering facility, the website also includes valuable product information, availability, delivery details etc. Contact your Swarovski sales office to register for this service.

Application Information

<<<

Useful information about different techniques for applying SWAROVSKI ELEMENTS is provided in the Application Manual. It contains detailed instructions for correct gluing, Hotfix application, sewing, mechanical application, soldering and electroplating of our products, as well as helpful care instructions and explanations of required machines, tools and aids and their suppliers. It describes all the various processes for working with our products and includes helpful illustrations and images.

Any application information is also available online at WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS. For special requests please contact your Swarovski sales office.

FUSION *concepts*

Following the trend for a refined glamorous look, SWAROVSKI ELEMENTS complements its assortment with a totally new direction: Fusion Concepts, a new interpretation of crystal with other types of materials.

The first innovation in this product group is Crystal Mosaic, a glamorous yet refined crystal, discrete sparkling elements, available in five special colours. Ceramics, the second range of innovative products in the era of the Fusion Concepts, is an entirely new material – heritage of ancient cultures, taken up by SWAROVSKI ELEMENTS.

SEW-ON stones

Sew-on Stones are loose crystal elements that can be sewn by hand or machine onto any type of textiles or accessories. Sew-on Stones come in two- or three-hole varieties and can be used for a range of decorative purposes or for fine embroidery. Lochrosen are crystals with just one hole.

fancy STONES & settings

Fancy Stones are offered in numerous shapes ranging from classical gemstone inspired cuts to progressive trend cuts. They come in a huge assortment of different sizes and colours. Showing either a faceted or flat reverse side, Fancy Stones can be glued into pre-cast cavities or used in metal settings. Their precision cut facets assure the highest brilliance and endow design ideas with a unique sparkle.

Settings are unplated brass components, each specifically tailored to a Fancy Stone, that secure the crystal and allow for a myriad of application possibilities including but not limited to sewing, soldering and gluing. Additionally settings can be plated and are easy to work with.

beads

Crystal Beads are very popular and easy to use. They are available in the latest fashion colours, effects and cuts. Used in a variety of applications (beading, sewing, wire work, etc.), they blend perfectly with other crystal elements. They are available as loose elements, or linked as Bead Chains (please see Cupchains & Findings assortment).

CRYSTAL *pearls*

Crystal Pearls are perfect replica of genuine pearls. Made of a unique crystal core covered with an innovative pearl coating, these pearls possess a flawless, silky smooth, rounded surface. They are available in a variety of shapes, sizes and colours. Crystal Pearls are delivered loosely threaded or, if desired, also knotted. Different hole diameters are available to accommodate a range of applications: In contrast to other articles in the range, Crystal Pearl 5811 is perfectly suited for applications that require a larger hole diameter.

transfers

Transfers are ideal for the Hotfix application on all kinds of textiles. They are available in a large range of motives and rows, which are made up of different articles of the Flat Backs Hotfix assortment. Featuring designs from the in-house design team, they can comprise XILION Roses, Ringed XILION Roses or Creation Stones, as well as Metallics and Crystaltex Motives.

Transfers are also available as No Hotfix version, to be glued onto any material.

The offered Transfers motives are divided in three categories: Standard Collection, Trend Collections and Special Collections to suit all needs in the targeted segments such as women's wear, sports & casual wear, children's wear etc.

plastic TRIMMINGS

Plastic Trimmings are carrier materials made of plastic into which different loose crystals have been integrated. These multi-functional products can either be hand- or machine sewn or glued onto various surfaces. The range of bandings not only offers the large colour selection of XILION Chatons, but also a variety of casing colours. The wide range of plastic components enables many different designs in all segments.

buttons, fasteners & ZIPPERS

Crystal Buttons can be used in exactly the same way as standard buttons. The assortment of available buttons ranges from those for shirts, blouses, jackets and coats, to buttons for denim wear and accessories. They are suitable for hand and mechanical application. The assortment includes Crystal Buttons, Buttons with Plastic Shanks, Jeans- and Decorative Buttons as well as Snap- and Magnet Fasteners in a variety of sizes, colours and effects.

Zippers from our assortment are unique because the crystals are integrated into the zipper teeth, allowing them to be used in the same way as standard zippers.

METAL *trimmings*

Metal Trimmings are semi-finished metal products integrating XILION Chatons and XILION Flat Backs. They can be sewn by hand or machine, and mechanically applied onto different fabrics or other materials. Metal Trimmings are bestsellers among the textile, shoe and accessories segments because they can be used in a multitude of different ways and feature a whole range of different application possibilities.

CRYSTAL mesh

Crystal Mesh is a fluid metal mesh carrier with integrated loose crystals. The product is available in a wide range of colours and casings, as Hotfix version, which can be applied by heat, or as No Hotfix version that can be hand- or machine sewn. Customised solutions are possible and customers are able to choose special motives incorporating up to nine colours. Crystal Mesh is suitable for a wide range of segments such as for example the textile and accessories segment.

KNOBS, *handles* & CO

Knobs, Handles & Co are loose crystal elements as well as semi-finished products. They are ideal for use in the interior segment, for example for bathroom applications or furniture. The articles offered are divided into four categories: Centerparts, Balls, Lever Handles and Semi-finished articles. All of these products come in a large variety of shapes and can be easily applied by gluing and/or screwing.

SWAROVSKI ELEMENTS satisfy all the most important industry standards and norms:

Oeko-Tex Certificate

All jewelry and textile components from our SWAROVSKI ELEMENTS product assortment (all product groups with exception to product group 20: Knobs, Handles & Co.) conform to Class II (direct contact to skin) of the Oeko-Tex standard, an international safety standard for the textile industry with regard to specific health damaging substances.

EN71/3 and ASTM F963-03 Certificate

SWAROVSKI ELEMENTS fulfill the EN71/3 and ASTM F963-03 norms with reference to the allowable solubility of substances defined in aforementioned norms for children's toys.

Platinum Foiling and M-Foiling free of hazardous substances

The foilings used for SWAROVSKI ELEMENTS are compliant with the CPSC 16 CFR 1303 and do not exceed the lead limit for surface coatings.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow or insert the crystal into their noses. With crystal-applied magnetic products, pose a particular risk of serious intestinal injuries if ingested.

The application techniques as stated in the Application Manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets the relevant requirements related to small parts hazards and assess any risk it may pose to small children. Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

RoHS compliance

The RoHS Directive which is in effect since July 1, 2006 regulates the use of certain hazardous substances (e.g. lead, cadmium, mercury, ...) in connection with electrical and electronic equipment.

Based on the exemption granted to the glass industry for bound lead in crystal glass, the majority of our crystal assortment* (including effects and Crystal Pearl coatings) may be continued to be used in the area of electric and electronic devices.

REACH

The **R**egistration, **E**valuation and **A**uthorization of **C**hemicals is an EU regulation that came into force on June 1, 2007. Under this regulation, manufacturers or importers of chemicals must pass on information about chemicals that are contained in the products they provide. This information needs to be provided both to customers and to the European Chemicals Agency.

Swarovski fulfils all the requirements of the REACH regulation.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow or insert the crystal into their noses.

Warning for tableware

Application of loose crystals to tableware presents a potential risk of aspiration, choking, swallowing, or tooth damage should crystals become loose. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food or the mouth, and crystals should never be placed on any tableware intended for use by children. Tableware with crystals intended for decorative use only should be marked as such. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand.

The application techniques or suggestions in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards or use in food contact items and assess any risk it may pose to users.

The use of crystals (which may contain restricted substances deemed hazardous under local laws) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Unsuitable Applications

SWAROVSKI ELEMENTS are intended for use in the fields of fashion, jewellery, accessories, textile products and for interior décor. Due to their physical properties, SWAROVSKI ELEMENTS are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third party claims based on product liability or otherwise relating to uses of Swarovski products purchased by customer, and waives all its own claims.

Responsibility of user

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user's responsibility.
