INFORMATION ON CERTIFICATES AND COMPLIANCE OF SWAROVSKI ELEMENTS

MORE THAN 100 YEARS OF *innovation* AND *experience*

Swarovski has been dedicated to perfection in all aspects of crystal creativity since 1895. Today, Swarovski is an inspiration to the entire design world in terms of precision-cut crystal.

RESPECT AND *responsibility*

Swarovski products all reflect the company's corporate values of respect, integrity and social and environmental responsibility. SWAROVSKI ELEMENTS are synonymous with the spirit of innovation – not only from a design perspective but also with regard to certificates and compliance to laws governing health and safety.

PLATINUM FOILING AND M-FOILING FREE OF HAZARDOUS SUBSTANCES

The foilings used for SWAROVSKI ELEMENTS are compliant according to 16 CFR 1303 and do not exceed the lead limit for surface coatings.

ROHS COMPLIANCE

The RoHS Directive, which has been in effect since July 1, 2006, regulates the use of certain hazardous substances (e.g. lead, cadmium, mercury, ...) in connection with electrical and electronic equipment. Based on the exemption granted to the glass industry for bound lead in crystal glass, the majority of our crystal assortment* may be continued to be used in the area of electric and electronic devices.

REACH

The Registration, Evaluation and Authorization of Chemicals is a new EU regulation that came into force on June 1, 2007. Under this regulation, manufacturers or importers of chemicals must pass on information about chemicals that are contained in the products they provide. This information needs to be provided both to customers and to the European Chemicals Agency. Swarovski fulfils all the requirements of the REACH regulation. For further information regarding compliance and/or application recommendations please refer to our business website WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS or to our Application Manual.

advanced CRYSTAL – A *new* CRYSTAL *standard*

ADVANCED CRYSTAL is a further fascinating example of Swarovski's boundless capacity to innovate. ADVANCED CRYSTAL is a pioneering crystal recipe that sets new standards, far exceeds the state-of-the-art technologies that are the norm within the branch, and has been registered for patent by Swarovski.

ADVANCED CRYSTAL – ABUNDANT WITH ADVANTAGES

ADVANCED CRYSTAL is a new form of sustainable crystal whose revolutionary sustainability is achieved through the use of innovative processes.

ADVANCED CRYSTAL is a patented crystal recipe.

The renowned institute Fraunhofer ISC** tested and confirmed the unique brilliance and sustainable composition of the crystal blend of ADVANCED CRYSTAL.

ADVANCED CRYSTAL conforms with laws, safety requirements, norms and non-mandatory standards*** that include the following:

- CPSIA (lead limit)
- RoHS, EIP Measures, Korean Act
- EN 71/3 – European Norm for the Safety of Toys for Children
- ASTM F963-8, point 4.3.5.2. – US Norm for the Safety of Toys for Children
- Packaging Directive (94/62/EC and TPCH)
- Nickel release
- OEKO-TEX 100

* At time of printing non RoHS-compliant colours are: Citrine, Dark Red Coral, Emerald, Fireopal, Garnet, Hyacinth, Light Siam, Olivine, Palace Green Opal, Siam and Sun

** The Fraunhofer Institute ISC has confirmed that the tested samples of Swarovski fulfill all optical and visual characteristics of the highest classification according to the European Crystal Directive, as well as the highest class ("Ultra Clear") according to ISO IWA08. The tested samples contained none of the substances usually used in full lead crystal to ensure a high refractive index, such as lead or barium, and comply with the patent registered by Swarovski, EP 1725 502.

*** Status as of September 2011; Please note: Individual states in the U.S. may impose labeling requirements regarding lead and other substances used in consumer products even if the product complies with the federal CPSIA lead limit.

Fancy Stones & Settings

The new XILION upgrade

The revolutionary XILION technology, characterized by alternating small and large facets, boosts the power of light reflection and intensifies the luminosity of the refracted light.

This copyright protected XILION cut has been successfully implemented in various product groups from the SWAROVSKI ELEMENTS assortment.

SWAROVSKI ELEMENTS now introduces the XILION cut applied to the Heart shape element as part of the Fall/Winter 2012/2013 launch.

Art. 4800 → art. 4884 XILION Heart (p. 33)

The results are clearly visible – these upgraded XILION articles are convincing proof of the unique XILION brilliance.

The latest methods of measuring light refraction have been deployed to develop the new XILION Heart – and also to prove the Crystal Stone's inimitable brilliance.

Bolder light reflection and intensified scintillation produce the optimal light distribution and result in the highly brilliant XILION look.

Article Explanation

Unique XILION brilliance for the existing Heart Fancy Stone

After the successful implementation of XILION Navette, XILION Square, XILION Pear and XILION Oval, SWAROVSKI ELEMENTS continues to extend the XILION product family and has now achieved a brilliant XILION cut on its Heart Fancy Stone.

With this upgrade the existing Heart Fancy Stone art. 4800 is completely replaced by the new art. 4884 XILION Heart.

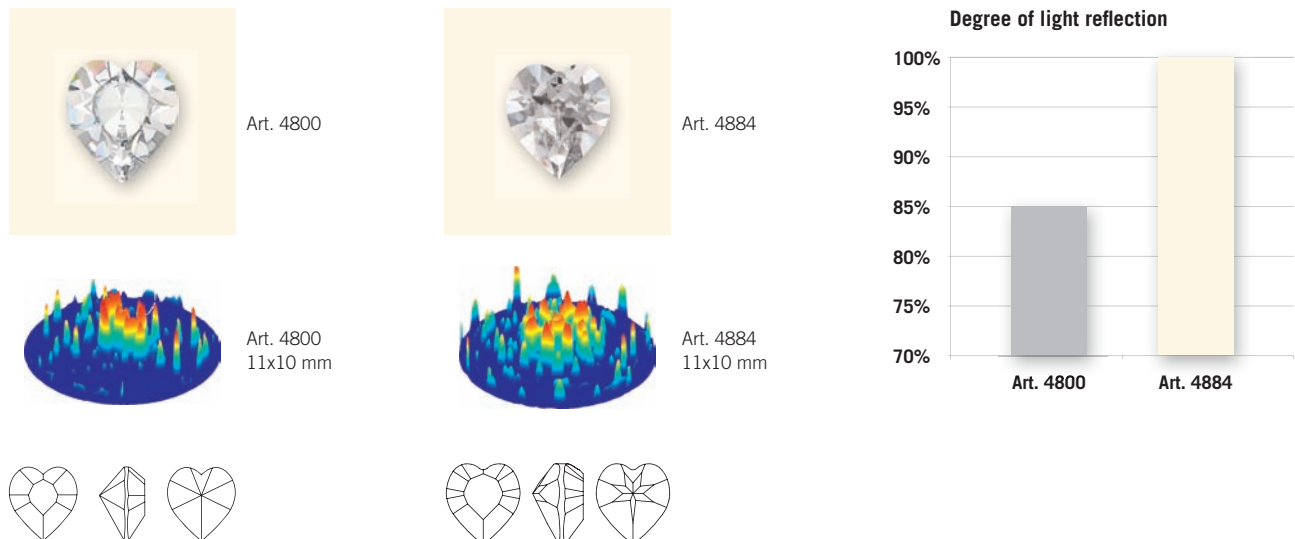

This new article is available in the same size range and harmonized to match the extended color assortment as the previous art. 4800.

Brilliance that you can see and measure

Art. 4884 XILION Heart is captivating with its distinct luminosity that is generated by the increased reflection of individual points of light versus art. 4800.

Product Characteristics

Art. 4884 XILION Heart offers the following advantages:

- The sophisticated XILION cut results in unique brilliance.
- Complex faceting imitates the look and luminosity of a multi-layered cut.
- Copyright protected XILION cut by Swarovski.
- Same price level as art. 4800.
- Same size range as art. 4800.
- Comprehensive and extended color assortment.

Application

Molds

Existing molds can be used for the application of XILION Heart, since its dimensions and geometry are nearly identical to the previous articles. No changes to application methods are therefore necessary for this improved article.

Launch and Transitional Period

Please note that during a transitional period until December 2011, we will deliver both versions (previous and new) according to their availability.

Semi-finished Products

The new XILION Heart will be introduced in the art. 12204 Heart Single Stone Setting and art. 52200 Heart Channel. The design pattern of the article will be changed from art. 4800 to art. 4884 as of September 2011. The system numbers will remain the same. All orders placed from September 2011 onwards will be filled using art. 4884 XILION Heart.

Special Motif Service

<<<

A special motif is any individual design created by the customer, which is different from the Crystaltex-it Chaton Motives Standard Collection or Trend Collections. This service opens up many customization possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customization options for existing motives is available (see "Customization Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs. All Standard Crystaltex Chaton Motives are also available as „It-version“ and vice versa.

Customization Possibilities

<<<

Min. size: 10x10 mm

Max. size: 122x157 mm

Distance between Chatons 1028 PP 9 (from stone center to stone center): min. 1.70 mm – max. 4.5 mm

Up to four colors are possible for Crystaltex and Crystaltex-it Chaton Motives using stone size PP 9.

Ordering Process

<<<

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to (Crystaltex Chaton Motif, Crystaltex-it Chaton Motif). You will then receive a quotation including your article number, minimum order quantity (MOQ), price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

<<<

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied.

Please note that the simple order of a design does not grant exclusive production of this design to the customer.

Over- or undersupply of +/- 10% is possible and has to be accepted.

The new effect Crystal Moonlight Blue (001 MOL) is also available for Crystal Fabric Motives. You can use the Special Motif Service for your own creations. Please refer to page 435 of the SWAROVSKI ELEMENTS Collection 2010.

An intensely sophisticated and eye-catching new hue, Crystal Bermuda Blue is the latest effect addition to the immensely popular Crystal Rocks. The line has also been extended to include the possibility of using a black backing film for the existing effects Crystal Aurore Boreale, Crystal Red Magma and Crystal Silver Shade allowing a range of new design possibilities.

Special Motif Service

<<<

A special motif is any individual design created by the customer, which is different from the Crystaltex Chaton Motives Standard Collection or Trend Collections. This service opens up many customization possibilities and enables you to profit from Swarovski's longtime experience and design expertise. A range of customization options for existing motives is available (see "Customization Possibilities" below). You may also submit sketches of a design that will suit your special needs – such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which allows for easy adjustments according to your needs. All Standard Crystaltex Chaton Motives are also available as „It-version“ and vice versa.

Customization Possibilities

<<<

Min. Size: 10x10 mm

Max. Size: 122x157 mm

Distance between Chatons 1028 PP 9 (from stone center to stone center): min. 1.70 mm – max. 4.5 mm

Up to four colors are possible for Crystaltex and Crystaltex-it Chaton Motives using stone size PP 9.

Ordering Process

<<<

Send the request with a drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements to the desired motif. Please also indicate which product group your special motif refers to (Crystaltex Chaton, Crystaltex-it Chaton). You will then receive a quotation including your article number, minimum order quantity (MOQ), price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

<<<

Please always submit your drawing of the desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reinterpret. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP or DXF format will ensure that we have clear data to work with. These can also be sent via email or on a CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if feasibility is given and our General Terms and Conditions are applied. Please note that the simple order of a design does not grant exclusive production of this design to the customer.

Over- or undersupply of +/- 10% is possible and has to be accepted.

Advice on Application

Crystaltext Chaton Motives can be easily applied by using a standard heat press. The following parameters should give you an overview about the possibilities of applying this product onto different fabrics. In order to ensure the right conditions and to establish the best choice of application aids, we strongly recommend carrying out tests with the original fabrics.

Please refer to the Application Manual and our Business Website (closed area) WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS for detailed information on the application.

Care Instructions

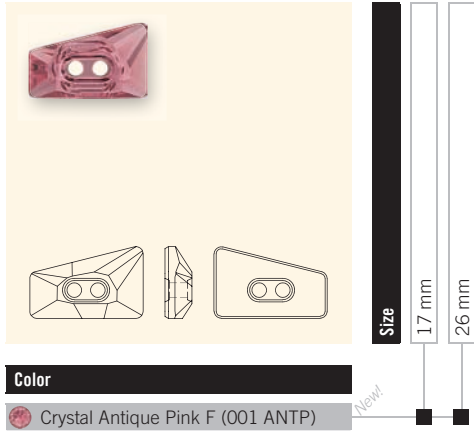

GENERAL RECOMMENDATIONS	Turn inside out, choose a gentle wash cycle and use a mild laundry detergent.	Do not use chlorine bleach!	Do not tumble dry!	Iron inside out using a silk/polyester/viscose setting.	The textile can be gently dry-cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet-cleaning. Turn inside out.
	To protect the crystals as much as possible, the use of a soft wash bag is recommended.			Ironing the textile inside out and using a pressing cloth is recommended.

Buttons, Fasteners & Zippers

Crystal Buttons

3052 Trapeze Crystal Button

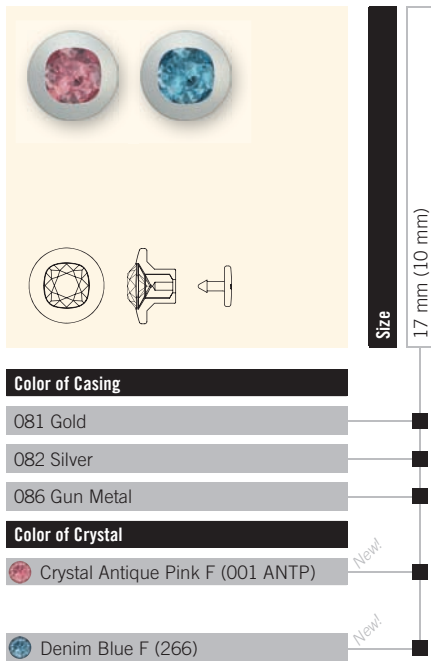

The image shows a photograph of a pink trapeze crystal button with two holes. Below it are technical drawings: a perspective view, a side view showing the button's thickness, and a top-down view of the button's shape. To the right of the drawings is a vertical dimension line labeled 'Size' with two segments: the top segment is labeled '17 mm' and the bottom segment is labeled '26 mm'. Below the technical drawing is a 'Color' section with a black header and a single option: 'Crystal Antique Pink F (001 ANTP)' with a small pink circle icon. A 'New!' label is positioned to the left of the color selection bar.

Buttons, Fasteners & Zippers

Jeans Buttons

1792/100

The image shows a photograph of two jeans buttons, one with a pink crystal and one with a blue crystal. Below it are technical drawings: a perspective view of the button, a side view showing the button's thickness, and a top-down view of the button's shape. To the right of the drawings is a vertical dimension line labeled 'Size' with a single segment labeled '17 mm (10 mm)'. Below the technical drawing is a 'Color of Casing' section with a black header and three options: '081 Gold', '082 Silver', and '086 Gun Metal'. Below that is a 'Color of Crystal' section with a black header and two options: 'Crystal Antique Pink F (001 ANTP)' and 'Denim Blue F (266)'. 'New!' labels are positioned to the left of the crystal color selection bars.

Article Explanation

The new Crystal Pearl Button has a refined and elegant look and is the latest novelty within the Jeans Buttons assortment. The Crystal Pearl Button is a perfect match to the existing Pearl Rivets. It is available in three different casing colors.

Advice on Application

The Crystal Pearl Button can be easily applied using a fly press.

It is very important to carefully check the thickness of the fabric before beginning the application process. Tests on samples are highly recommended before going ahead with the final application process so that any possible contraction or crinkling of the material may be avoided.

In order to prevent possible injury, the wearing of protective eyewear is recommended when mechanically applying crystal products.

Tools for fly press

The Jeans Buttons tool already available may be used for the application of Crystal Pearl Buttons simply by changing the corresponding spare part for the upper die:

TOOL SET	<p>Art. 9060/020</p> 
UPPER DIE	<p>Art. 9060/009</p> 
SPARE PART FOR UPPER DIE	<p>Art. 9060/017</p> 
LOWER DIE	<p>Art. 9060/016</p> 
THREAD ADAPTER	<p>Art. 9060/014*</p> 
CHANGING PIN	<p>Art. 9060/015</p> 

* When using die art. 9060/009, please employ the specially developed thread adapter Art. 9060/014.

It is important to make sure that the tool is sitting straight and firmly set in the fly press.
 Stop position: the offset can be regulated using the adjustable stop that is fastened to the handle.

Please refer to the Application Manual and our Business Website (closed area) WWW.SWAROVSKI-ELEMENTS.COM/BUSINESS for detailed information on the application.

Care Instructions

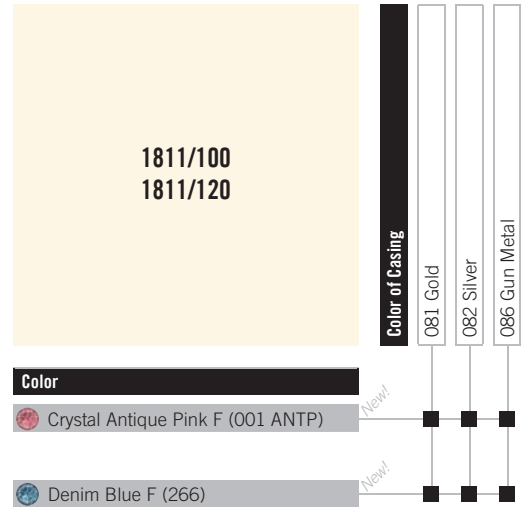

GENERAL RECOMMENDATIONS	Turn inside out, and use a mild laundry detergent.	Do not use chlorine bleach!	Do not tumble dry.	Do not iron.	The textile can be gently dry-cleaned using hydrocarbon. Turn inside out.	The textile will withstand gentle professional wet-cleaning. Turn inside out.
				Do not iron directly over the crystals.	Use of a soft wash bag to best protect the crystals.

Upgrade

<<<

Flat Back Bandings (art. 55000, 55001, 55500 and 55501), Flat Back Motives and Roses Montées (art. 53100, 53102 and 53103)

The recently launched 2058 XILION Rose Enhanced No Hotfix is now being integrated into all Flat Back Bandings, Flat Back Motives and Roses Montées. This advanced Flat Back shows an enhanced brilliance through an improved table size. The Crystal Stone's new geometry also increases the intensity of the colors and it also has the same luminosity as a multi-layered cut.

With this upgrade, the existing Flat Back Bandings, Flat Back Motives and Roses Montées will only be available with art. 2058 XILION Rose Enhanced No Hotfix. All casing colors and crystal colors will remain the same. Please note that during a transition period until mid of 2012, both versions (articles with previous art. 2028 and new art. 2058) will be delivered according to their availability.

General Warning

Loose crystals may present a small parts hazard to young children, particularly children under three years old. Depending on the size of the crystal and any attached material (such as glue, fabric, etc.), children may choke on, inhale, swallow or insert the crystal into nose. With crystal applied magnetic products pose a particular risk of serious intestinal injuries if ingested.

The application techniques in this manual do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

Failure to follow Swarovski's care instructions may result in damage to the crystal, which could pose a risk of laceration or other harm.

Warning for Crystal Tattoos

Crystal Tattoos may be applied on healthy skin only. Do not adhere to eyes or on mucous membranes. Crystal Tattoos are not recommended for young children. Loose crystals may present a small parts hazard to young children, particularly children under three years old. If a crystal comes loose, depending on the size of the crystal, children may choke on, inhale, swallow or insert the crystal into nose.

Warning for Magnetic Products

Loose crystals may present a small parts hazard to young children, particularly children under three years old. With crystal applied magnetic products pose a particular risk of serious intestinal injuries if ingested. For each application of magnetic crystal products, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

Warning

Application of loose crystals to tableware presents a risk of aspiration, choking, swallowing, or tooth damage. To reduce this risk, crystals should never be applied to any surface of tableware likely to come in contact with food and crystals should never be placed on any tableware intended for use by children. To avoid dishwasher damage, tableware decorated with crystals should be washed by hand.

The application techniques in this manual/suggestion do not guarantee that crystals will not come loose. For each application, the manufacturer must determine whether the product meets relevant requirements related to small parts hazards and assess any risk it may pose to small children.

The use of crystals (which may contain substances known as hazardous) and adhesives on tableware is subject to legal restrictions in specific countries. The customer is fully responsible to comply with these country-specific provisions and shall defend, indemnify and hold Swarovski harmless from any and all third-party claims based on product liability or otherwise relating to uses of Swarovski products and waives all its own claims against Swarovski.

Notice for Application on Packaging

The use of crystal that may contain substances like lead, cadmium or hexavalent chromium, on packaging is subject to legal restrictions in specific countries, including but not limited in regard to the total content of substances based on the proportion between crystal mass to the remaining weight of packaging. The customer is fully responsible to comply with these country-specific provisions and to pass on this information to his customers.

Care Instructions

Failure to follow Swarovski's care instruction may result in damage to the Swarovski product, which could pose a risk of laceration or other harm.

Please be informed that all conventional laundering processes (household washing machine as well as professional dry-cleaning) have a considerable mechanical influence onto the garment, which is based on the rotation of the washing drum. The essential requirement for a safety laundering process is that the Swarovski products are properly applied without restrictions regarding the adherence of the Swarovski products. The bigger the size of the used Swarovski product is and the more Swarovski products are applied next to each other, the more a risk of damage has to be taken into consideration. Swarovski products are made of or incorporate crystal and therefore must be handled with due care!

Generally, to best protect the Swarovski products from breaking we recommend the use of a soft washing bag and to fill up the washing drum. Turning inside out before washing and selection of a gentle washing program, plus the use of mild detergents are important prerequisites to safeguard the quality of our Swarovski products. Our care instructions based on DIN EN ISO 3758 list up all Swarovski product groups as overview so that each used Swarovski product still needs to be judged in terms of its cleaning suitability for the intended purpose and finished product by the customer. Swarovski's recommendations are given according to the current state of our knowledge and Swarovski's determination of the qualification as textile application product. The customer is therefore fully responsible to determine the cleaning process applicable to the finished product, taking the Swarovski care instructions as well as those of third party materials into account. The variety of shape, cut, surface effect, size and application weight respectively amount of used Swarovski products are decisive for the determination of the suitable cleaning process.

To be entirely safe customers respectively dry-cleaners usually take off Sew-on Stones, Buttons, etc. of bigger size before cleaning and re-apply them afterwards.

Responsibility of user

Any oral, written or test-based advice that Swarovski provides regarding techniques for application of its products are recommendations based on Swarovski's current knowledge and the information provided by its suppliers. Such advice does not discharge customer from carrying out its own tests of techniques it proposes to use and their suitability for the intended application. The application, use and processing of these techniques and products are solely user's responsibility.

Unsuitable Applications

SWAROVSKI ELEMENTS are intended for use in the fields of fashion, jewellery, accessories, textile products and for interior décor. Due to their physical properties, SWAROVSKI ELEMENTS are unsuitable for other uses (e.g. gluing onto teeth, using crystals on or near mucous membranes and other unsafe uses). The customer shall defend, indemnify and hold Swarovski harmless from any and all third party claims based on product liability or otherwise relating to uses of Swarovski products purchased by customer, and waives all its own claims.
